A QUANTUM LEAP IN UV-TECHNOLOGY

UVA LEDs and Beauty LEDs

Aspherical glass lenses

Optimal spectral combination

Homogeneous illumination

Consistently high performance

Reduced power consumption

Based on the motto "Sunshine meets design", KBL, in cooperation with the Studio F. A. Porsche, has introduced a new era of solarium design with the P9. With the P9S, KBL is now setting new standards in UV-technology for the face and décolleté. Earlier UV-Systems generate unwanted heat during a tanning session as a result of infrared radiation, which often leads to reddened or tense skin after sunbathing. The P9S's innovative LED-based SunSphere System avoids this unwanted infrared radiation and only uses the wavelengths desired during tanning.

Homogeneously distributed via aspherical glass lenses. Blue UVA LEDs guarantee excellent direct pigmentation for an immediately visible tan. Red Beauty LEDs soothe the skin while tanning. And yellow UVB special lamps build up pigments. The perfect spectral combination for an incomparable tanning experience. In addition, the new SunSphere System offers a consistently high LED output, makes high pressure bulb changes unnecessary and drastically reduces your power consumption.

P9S

THE FUTURE OF SUNSHINE

SUNSPHERE

SunSphere Facials

SunSphere Shoulders

SunSphere UVA-LEDs

SunSphere Beauty LEDs

UVB-ThinLights

It's immediately obvious that it's a quantum leap in the field of spectral technology. High-performance LEDs only produce the wavelengths desired for a beautiful tan and a gentle tanning experience.

At the same time, aspherical lenses in front of the LEDs guarantee an absolutely homogeneous illumination of the face and décolleté. Progress that is immediately noticeable and, with the P9S, was also implemented in shoulder area.

SUN IN BEST SHAPE

140 UVA LEDs

A beautiful tan just the way you like it. 140 blue UVA LEDs guarantee an optimally dosable direct pigmentation of the face and décolleté.

3 UVB SPECIAL LAMPS

The perfectly balanced output from three yellow UVB special lamps builds up new color pigments.

56 BEAUTY LEDs

With 56 red Beauty LEDs, the P9S provides skin care for the face and décolleté even while sunbathing and stimulates the oxygen supply in the skin at the same time. For a beautiful complexion and a silky smooth skin.

SunSphere
Facials

THOUGHT-OUT TO THE LAST DETAIL

The innovative heat sink makes fans redundant and reduces noise generation for a relaxing experience.

Each of the four SunSphere facials combines special boards with a perfectly optimized spectral combination of UVA LEDs and Beauty LEDs.

An acrylic shield seals off the high-power LEDs to create a dust-free environment and eliminates the need for cleaning.

The filter glass with 49 aspherical glass lenses offers an optimal light distribution for the face and décolleté, without any hotspots.

ENERGY EFFICIENT

Compared to conventional high-pressure Systems with UV bulbs, the LED-based SunSphere technology from KBL reduces power consumption by up to 80%.

LONG LASTING PERFORMANCE

Conventional high pressure bulbs must be replaced at regular intervals and show a significant drop in output over time. The lifetime of the high-power LEDs within the SunSphere Systems is up to 25 times longer, with virtually no loss in tanning performance.

HOMOGENEOUS ILLUMINATION

Compared to conventional UV Systems, the SunSphere LEDs provide a much more homogeneous illumination of the face and décolleté. With no hotspots whatsoever.

KBL

PERFECT SYMBIOSIS

The new SunSphere System consisting of high-performance LEDs and aspherical glass lenses is also implemented in the shoulder area. A spectral combination that guarantees beautiful complexion. The integrated Sound System ensures a brilliant sound experience. And a voice assistant guides through the operating functions.

A STARGAZING LIGHT SHOW

The P9S with its matrix light show captivates from the very first moment. Over 2.400 individually controllable special LEDs allow extraordinary light animations in shape and color. The P9S comes standard with a wide variety of selectable light show programmes.

EASY TO USE

Customers love the consistent operating logic in all KBL solariums.
The P9S impresses with proven function icons in a new look, clearly structured and intuitive to operate. Ease of use par excellence.

Easy Control

SPECIAL TOUCH

Our Intelligent Control System in a new look: video clips introduce the P9S to your customers and point out the individually adjustable comfort features. Ahead of a session, personal preferences can be selected via the intuitive touch display. The operator has comfortable access to all important maintenance and service settings. Additionally, studio operators can also import customised video clips with advertising messages.

STRIKING OPTICS

Solarium design in the footsteps of the legendary Porsche 911. The design icon as envisioned by Ferdinand Alexander Porsche continues to fascinate people all over the world to this day. And thus the Studio F. A. Porsche was the ideal candidate for our ambitious P9 design project. The result: a unique design that captivates your customers. The 'Magic Silver' chassis color fascinates with a variety of selectable light show programmes.

Magic Silver

RADIANT APPEARANCE

The right choice for all studio concepts: with the 'Wonder White' chassis color, the P9S is a real highlight in every spa atmosphere. Naturally with color-coordinated light animations that fascinate customers over and over again.

Wonder White

TRENDSETTER

The rose-gold color isn't just trendy for design icons like the iPhone. The characteristic copper shade communicates straightaway the premium aspiration of the P9S along with its color-coordinated light animations. And because two thirds of all solarium users are female, it's no surprise that our new 'Copper Rose' chassis color is the clear favourite of this target group in market research studies.

TECHNICAL DATA

Maximum power consumption	12,5 kW
Weight	1477 lbs (with air condition)
Bed pane max. load capacity	330 lbs

Electrical connection values

Mains voltage	3-phase: 3 x 220 V / ~ / 60 Hz
Wire cross section	3-phase: 4 x AWG6
THHN cable in a isolation tubing (e.g. flexible metallic conduit, utilizing appropriate connectors)	
Breaker	3-pole, 3 x 50A with residual current

Ambient conditions – In dry rooms (booths) with sufficient airing and ventilation

Recommended room size:	10' (Width) x 9' (Depth)
Maximum relative air humidity:	70%
Maximum room temperature:	86°F (30°C)
Minimal distance to side walls:	4"
Minimum room height:	94,5"
Distance to backwall:	0"

Dimensions (inches) (height x width x depth)

Closed:	62,88" x 94,37" x 60,32" (84,65" h with exhaust)
Open:	78,67" x 94,37" x 59,14" (84,65" h with exhaust)

Design must be honest!

These four words spoken by Prof. Ferdinand Alexander Porsche get to the heart of his philosophy in which design is not simply decoration or superficial beautification, but rather the perfect symbiosis of form and function. This can only be achieved once the functionality of a product is fully captured.

When the studio was founded in 1972 in Zell am See, F. A. Porsche had already delivered the evidence of this philosophy: the design for the Porsche 911. An unembellished, timeless design that embodies the technical essence of the sports car like a perfectly tailored suit.

A passionate expression of motion – even when still. The fascination for puristic design still motivates Studio F. A. Porsche today. It permeates all the areas for which Studio F. A. Porsche designs objects in the 21st century: product, transport and space design.
